## Term 5 Week 1 **Answers**

### Session 2: Comparing and ordering 5/6-digit numbers

#### *Fluency: can you do it?*

Insert < > or = to make these true:

$$12,341 < 22,341$$

$$34,432 > 31,562$$

$$45,729 > 45,689$$

$$70,564 > 70,546$$

$$89,763 < 89,768$$

$$722,341 < 822,341$$

$$344,329 > 335,626$$

$$457,296 > 456,897$$

$$705,643 > 705,463$$

$$897,638 = 897,683$$

Put the numbers in order from smallest to largest:

212,373; 316,784; 124,592; 432,603  
**124,592; 212,373; 316,784; 432,603**

.....

21,237; 31,684; 124,592; 43,603  
**21,237; 31,684; 43,603; 124,592**

.....

545,931; 531,243; 56,789; 508,289  
**56,789; 508,289; 531,243; 545,931**

.....

413,884; 413,484; 413,684; 431,984  
**413,484; 413,684; 413,884; 431,984**

.....

400,900; 409,000; 49,000; 490,000  
**49,000; 400,900; 409,000; 490,000**

.....
